**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2 and 5-6, drawn to a topical analgesic comprising an effective amount of each of the following components: cornmint oil; orange oil; pennyroyal oil; rosemary Spanish oil; coriander oil; menthyl acetate; alpha pinene; beta pinene; camphor white oil; calendula oil; mineral oil and almond oil, classified in class 424, subclass 725 or class 514, subclass 817 or class 514, subclass 899, for example.
- II. Claims 3-4 and 7-8, drawn to a topical analgesic comprising an effective amount of each of the following components: cornmint oil; orange oil; pennyroyal oil; rosemary Spanish oil; coriander oil; menthyl acetate; alpha pinene; beta pinene; camphor white oil; calendula oil; and mineral oil, classified in class in class 424, subclass 725 or class 514, subclass 817 or class 514, subclass 899, for example.
- III. Claims 9-10, drawn to a composition adapted to reduce pain associated with menstruation comprising an effective amount of each of the following components: to a topical analgesic comprising an effective amount of each of the following components: cornmint oil; orange oil; pennyroyal oil; rosemary Spanish oil; coriander oil; menthyl acetate; alpha pinene; beta pinene; camphor white oil; and calendula oil, classified in class in class

424, subclass 725 or class 514, subclass 817 or class 514, subclass 899,  
for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the three different groups are directed to three different compositions comprising different ingredients. Different compositions comprising different ingredients do not necessarily have the same functional effect.

Moreover, These compositions are capable of separate manufacture, use or sale, as claimed, and are patentable (novel and unobvious) over each other (though they may be unpatentable because of the prior art) subjects.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
